## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1 - 10, drawn to methods of induction of amyloid plaques, classified in class 435, subclass 7.1, for example.
  - II. Claims 11 - 32, drawn to methods of screening a selected amyloid therapeutic candidate and kits for performing said assays, classified in class 435, subclass 7.1, for example.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions require different starting materials and steps. The methods of group II require adding test solutions and measuring the disruption of amyloid plaques, neither of which is required for the method of Group I. Searching for the steps of Group I will not reveal whether or not the screening method of Group II is novel or non-obvious, as the search for the former will not encompass the steps of the latter.
3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter and because they require divergent searches, restriction for examination purposes as indicated is proper.
4. This application contains claims directed to the following patentably distinct species:

SPECIFIC SGAG MOLECULES:

  - a) heparin
  - b) heparan sulfate
  - c) keratin sulfate
  - d) dermatan sulfate
  - e) chondroitin-4-sulfate
  - f) chondroitin-6-sulfate

Art Unit: 1649

The species are independent or distinct because each species is a patentably distinct molecule with unique chemical properties. Furthermore search for any one will not reveal the other.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1 – 6, 8 – 9, 11 – 16, 18 – 19, 21 – 26, 28 – 29, and 31 – 32 are generic with respect to SGAG.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel Kolker whose telephone number is (571) 272-3181. The examiner can normally be reached on Mon - Fri 8:30AM - 5:00PM.
